

Animesh Samuel

Co-founder and Head of Product, Light Information Systems

Animesh Samuel is the cofounder and Product Head at Light Information Systems. An ad-venturer with a demonstrated history of product and marketing in the Information Technology industry. As cofounder at Light Information Systems, Animesh along with Sanjeev led a team of professionals to create the world's first answering engine using NLP AI and domain-based routing to ensure that every question gets an answer rather than web link. His team launched NLPBots, an horizontal AI NLP platform that automates conversations and processes for the enterprise and presented it at various awards and platforms recognized Red Herring – Top 100 companies in Asia, IDC Innovator, SAP ACE, Global Silicon Valley (Pioneer Summit -California 2017), Microsoft CNBC awards (Product Empowerment using AI), NASSCOMS (AI Game changer of the year 2018), Finalists at Next Big Idea (Governments of India and Canada), Open Innovation Contest (NTT Data), Webit 2019 (Founders games) etc.

Prior to founding Light Information Systems, Animesh has trained, consulted and counselled many corporate professionals from Infosys and Cognizant Technology Solutions during his tenure as a partner at KAPS International LLC. He has also worked as the CEO of Compulink India Pvt. Ltd. His articles and quotations have appeared in various tier one Business Media including Business Today, HT Mint, Economic times, etc. He believes his greatest asset is his relationships and people, loves to share his learnings freely.

He serves on the board of a few companies among them “Adventures Beyond Barriers Foundation” excites him as it brings to life a synergy between the people with Disability and those without Disability that gets everyone achieving extraordinary results.

After work hours is when Animesh loves to read, trek, swim, travel, ideate, mentor and build bridges rather than walls between humans.
